

## 1. Choose your colour

Choose 1, 2 or 3 out of 15 different lentil colours.

Information: Black food colouring is used to print on the lentils.

The colours red and cloud white are not available as single colours.

We would like to remind you that the diameter of the lentil is 12-13 mm, making the maximum size of the print approx. 10 mm. There are therefore limits on the level of detail that can be achieved.

## 2. Printing your message

The following print combinations on lentils are possible:

- a. text & text
- b. text & picture
- c. text & logo

When 1-3 lentil colours and one of these print combinations are chosen, the printed content is printed on the lentils in a random mixture. It is not possible to allocate the text/image or logo specifically. Targeted text/image/logo printing on specific lentils is only possible for orders of 30 kg or more of each individual colour and printed motif.

The motif is printed directly onto the individual My M&M's® lentils with black food colouring. One side of the lentils shows your individual message in the form of a text, image or logo; on the other side, the "M" as the recognisable logo of the My M&M's® brand is printed in grey.

Original My M&M's® lentils cannot be ordered without the "M".

## 3. Delivery of your print data

- a. text      Up to two individual messages can be printed per order, in the prescribed standard font. Design your message in one or two lines, each with a maximum of 9 characters.
- b. picture/logo      Please provide us with a JPG or PNG file with a minimum resolution of 75 dpi at a size of 600x600 pixel.

We would like to remind you that the diameter of the lentil is 12-13 mm, making the maximum size of the print approx. 10 mm. There are therefore limits on the level of detail that can be achieved.

Please ensure that the image or logo is not blurred, too dark or too light, and that the contrasts are not too extreme.

Please note that there are certain limitations on single-colour printing in black on the various lentil colours. Final assertions on the motif to be printed can only be made once it has been checked and approved by Mars Chocolat France.
